

Bates Private Capital had done business with Compass Computing in the past and had been impressed with their reliability and integrity, therefore when the time came to bring in a special computer consultant to help on a very important project Compass Computing was our first and only choice. As a small financial consulting company, we are very specialized in the services we offer and rely heavily on our reputation for integrity, timeliness and thoroughness.

One of our major clients had asked us to create for their use a program that would facilitate their in-house analysis. We already had this program created in VBA (developed many years prior) but needed to upgrade it into VB. We had a programmer on staff who had very little experience in VB and therefore needed expert help in the entire creation process. Our deadline for completion was two weeks away when Compass Computing Group, Inc. was sent to coordinate this programming process. With Compass's help not only was our VBA program imported into VB but it was also improved and enhanced through Compass Computing Group's creative ideas. Compass's dedication (they worked the weekends by our side) insured our completion by the due date and our client was thrilled with the results.

We would definitely recommend Compass to other companies and they will always be our first choice for use in the future. They are definitely dedicated to bringing their clients satisfaction. I can be contacted by others interested in Compass Computing Group, Inc.'s services via email at shelley@batescapital.com or via phone at (503) 699-9996.

Sincerely,

Shelley Pyles
